

Rock, Standard Auger Bits

Bits are available in sizes ranging from 4” to 36” including tree and shrub auger bits and rock and frost bits. The tree and shrub auger bit is designed with smaller diameter auger flighting at the bottom to leave space for root balls, fertilizer or mulch. Rock auger bits have conical (also called “bullet”) teeth to cut through the toughest ground and are available with standard, “fishtail” or conical center points. Other auger accessories include auger extensions and auger adapters for round to hex, hex to round and 2” round.

Rock auger bits feature a reinforced fabricated boring head, double wrapped flighting, conical carbide teeth and a standard “fishtail” center point. These bits are not intended for use in concrete or asphalt applications.

SPECIFICATIONS

Model	Weight (lbs/kg)	No. of Teeth	Tooth Style
RSQ6	75.0	3	Conical
RSQ9	85.0	6	Conical
RSQ12	110.0	6	Conical
RSQ15	145.0	7	Conical
RSQ18	165.0	8	Conical
RSQ24	178.0	12	Conical
RSQ36	286.0	18	Conical
