

Frost and Rock Ripper

★ Replaceable single point tooth to maximize penetrating power

★ Available in various sizes for compact excavators

★ T-1 steel used in all critical and high wear components

Specifically designed to pre-rip frozen ground or tough soil that exceeds a bucket's recommended duty. The frost and rock ripper can also be used to remove stumps, roots, or re-bar. T-1 Steel is used in all critical and high wear components to extend life of the attachment. The ripper body is supported by rigid gussets for extra rugged applications. Hardened bushings are standard at all pivot points.

The frost and rock ripper is available in two sizes for many compact excavators. Excavator model must be specified when ordering.
