

Similar in application to the skid steer grapples, the excavator grapple is designed to handle objects varying in size and shape. Remove large rocks, brush and debris with the excavator grapple. These grapples are not designed for digging or prying.

This attachment requires that a set of ears be welded to the excavator, then the operator can use the bucket curl cylinder to close the grapple. No auxiliary hydraulics are required for operation. Available in sizes from 24" (610 mm) to 42" (1066.8 mm).

Demolition and forestry type applications require additional operator protection, such as a poly-carbonate front window. Check application requirements.

- ⊙ **ALL SIZES HAVE A 42" OPENING**
- ⊙ **THREE TINES ON THE TOP, TWO TINES ON THE BOTTOM**

SPECIFICATIONS

Width	Weight (lbs/kg)
24"	750 / 340.2
30"	900 / 408.2
36"	1050 / 476.3
