

# Disc Harrow, Tandem

Disc under light cover material and prepare fine-finished seedbeds with these disc harrows. Rigid tubular steel gang frames support solid 1" axles and heavy cast iron bearing caps and spools. The bearing caps and spools are equipped with grease fittings for long service life. The high carbon-steel disc blades are spaced at 7-1/4" for excellent cutting and a fine-textured seedbed. Equipped with notched blades on the front gangs and plain on the rear.
