

CEAttachments offers Finish Mowers and Rotary Cutter attachments for your compact utility tractor to help you with lawn and landscaping maintenance.

Designed to make short work of your land maintenance needs. These Rotary Cutters feature beavertail-style rear deck panels to deflect thrown material downward. Heavy-duty 1/2" thick by 3" wide blades are mounted to a tough 3/8" thick stump jumper pan. All feature shear-bolt driveline protection. Optional front chain shielding is available and must be used to comply with OSHA regulation 1928.57, and SAE J232 and ANSI B71.4 standards unless it interferes with the mower function during agricultural use.

- ◎ **BEAVERTAIL-STYLE REAR DECK PANELS DEFLECT MATERIAL DOWNWARD**
