

These tough mowers will produce a lawn with the professionally groomed look your neighbors will envy. Four solid-rubber caster gauge wheels adjust the cutting height and allow the deck to float with the ground contour. The standard rear discharge provides a wide, unobstructed flow of cut material and allows for close trimming with either side of the mower. Optional side discharge kits are available.

SPECIFICATIONS

Model	Weight (lbs/kg)	Cutting Width	Cutting Height)	Tractor PTO HP	Blade Size (in/mm)
FM60	448/203.2	60"	.75 - 3.75	15 - 30	2x19.875/51x505
