

Brush Root Grapples

Standard Duty
Brush Root Grapple

Heavy Duty
Brush Root Grapple

Heavy Duty
Brush Root Rake

Handling brush, awkward debris, logs and more is made easy with the right grapple. The experts at CEA can help you to select the correct grapple based on your skid steer loader and your application.

The Standard Duty Brush Root Grapples are designed for handling awkward materials such as logs, tree stumps, brush or other loose materials. The 39" and 43" Grapples feature one cylinder and grapple arm, while the 60", 66", 72", 78", 84" and 90" grapples feature two.

The Heavy Duty Brush Root Grapples are full-featured units with dual, independent grapple arms to handle uneven loads, cushioned and sleeved cylinders and cylinder hose guards to protect all cylinder components, hardened 1-1/4" cylinder pivot pins, 100,000 PSI yield strength tine material for increased durability, and standard load check valve for positive clamp force.

The Heavy Duty Brush Root Rakes are ideal for tearing into roots, trash and rubbish. This is a great cleanup tool that will last.

SPECIFICATIONS

Part Number	Model	Description	Weight (lbs)	Overall Width (in/mm)	No. of Tines	No. of Cylinder Grapple Arms	Grapple Opening (in/mm)
