

Chipper

The standard-flow EDGE Wood Chipper attachment turns brush, branches and leaves into a perfect size chips for use as groundcover for pathways or in flowerbeds to control weeds, retaining moisture and improve composting processes. Perfect for woodlot owners, arborists and municipalities to dispose of brush and branches.

This easy to use attachment features a 20" x 20" self-feeding hopper opening to handle large and awkward size branches up to 4" in diameter and angles brush against the blades as it pulls material into the chipper. Air intake vents maximize blowing force to power the chips out of the chute up to 20'.

The 25" rotor features 2 hardened steel reversible chipping blades placed at 180 degrees to each other to keep the rotor in balance. The blades work together to cut, shear and shred the wood as it moves through the machine, rotating 1000 rpm at 24 gpm.

Folds up for easy transport & storage.

Other features include a twig breaker to break up twigs and other long material as it moves through the rotor compartment and a 65" discharge chute with 360 rotation and adjustable deflector for accurate placement of wood chips. The hopper easily folds up making it easy to travel on narrow trails, transport and store.

- ⊙ **STANDARD-FLOW, CHIPS BRANCHES UP TO 4" IN DIAMETER INTO VALUABLE WOOD CHIPS**
- ⊙ **20" X 20" SELF-FEEDING HOPPER ANGLES BRUSH AND PULLS MATERIAL INTO THE CHIPPER**
- ⊙ **AIR INTAKE VENTS POWER CHIPS OUT OF THE CHUTE UP TO 20'**
- ⊙ **25" ROTOR WITH HARDENED STEEL REVERSIBLE BLADES**
- ⊙ **TWIG BREAKER BREAKS UP LONG BRANCHES AS IT FEEDS THROUGH THE ROTOR**
