

# Cold Planers - High Flow

Few attachments can hold up to the daily abuse or meet the heavy-duty requirements of milling attachments. Designed for precise asphalt and concrete cuts, milling attachments are also valuable for utility crews and cable installation.

An invaluable tool for road construction and maintenance crews. Asphalt and concrete are quickly milled due to the high torque generated by the planetary gearbox. High flow models feature electro-hydraulic side-shift control, tilt/depth control and are single-circuit with 3 hydraulic lines. Comes complete with wire harness and control box, hoses, hose saver kit, flat-faced couplers and asphalt picks.

- ⊙ IDEAL FOR MILLING FROST HEAVES, TRAFFIC LANE STRIPES, POTHOLE REPAIR AND MORE
- ⊙ OPTIMIZED TOOTH PATTERN TO DELIVER POWER WHERE NEEDED
- ⊙ HIGH-FLOW MODELS FEATURE HYDRAULIC SIDE-SHIFT AND TILT/DEPTH ADJUSTMENT
- ⊙ MILLS UP TO 6" DEEP

## SPECIFICATIONS

Model	Weight (lbs/kg)	Hyd. Req. (gpm/lpm)	Tilt (degrees)	Max. Depth (in/mm)	No. of Picks	Working Width (in/mm)	Sideshift (in/mm)
CP16HF	1708/774.7	24-45/91-170	+/-15	6/152	48	16/406	24/610
