

Land Levelers

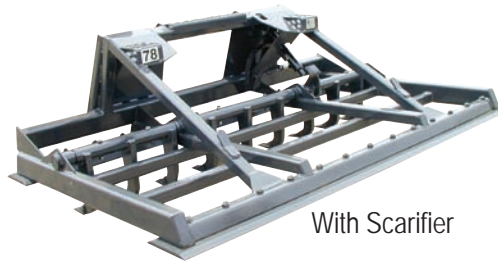

Designed to sift dirt and remove large chunks and rocks, this landscaping preparation attachment is just what is needed to smooth out lots, roads and trails, or prepare running tracks and ball fields. Available in three widths from 73" (1854 mm) to 86" (2184 mm).

Features unique brackets on top of the frame to set a bucket on and take less space on a trailer when transporting (note: bucket will still need to be secured before transporting). Comes complete with bolt on reversible cutting edges, hoses and flat face couplers.

This Land Leveler provides fast and efficient finish grading and is capable of aggressive cutting and fine finishing.

With Scarifier

The optional hydraulic scarifier allows you to loosen hard ground while grading as well. Nine 6" long teeth dig in and break up hard packed soil. A 1.5" (38 mm) x 6" (152 mm) hydraulic cylinder engages the scarifier teeth.

- ⊙ SIFTS DIRT AND REMOVES ROCKS FOR SMOOTH FINISH
- ⊙ NINE 6" TEETH ON SCARIFIER MODEL DIG IN AND BREAK UP HARD SOIL
- ⊙ SMOOTH OUT LOTS AND PREPARE RUNNING TRACKS AND BALL FIELDS
- ⊙ FRAME FEATURES UNIQUE BRACKETS TO SET A BUCKET ON TOP FOR TRANSPORT
