

Log Puller Grapple

Lift and handle heavy, awkward logs with controlled precision using the EDGE Log Puller Grapple. Load, unload and transport timbers up to 1500 lbs. out of the woods quickly and easily.

The serrated cradle of the grapple steadies logs in-line for straight-on loading or transport.

The grapple tines open to a maximum of 39" for grappling large objects and fold together as tight as 3" in diameter for holding brush or smaller material.

The spring centered grapple rotates up to 180 degrees and features spring-centered return, lateral lock and in-line lock positions for handling material at different angles. Comes complete with hose saver kit, hoses and flat face couplers.

- ⊙ 180 DEGREE ROTATION WITH SPRING CENTER GRAPPLE FOR HANDLING LOGS AT DIFFERENT ANGLES
- ⊙ LIFT AND TRANSPORT LOGS OR BRUSH FROM 3" TO 39" IN DIAMETER
- ⊙ SERRATED CRADLE STEADIES LOGS FOR CONTROLLED LEVERAGE OF LOAD
- ⊙ HANDLES LOADS UP TO 1500 LBS.
