

# Log Splitter

Designed to handle large, hard to split logs with ease, the EDGE Log Splitter will deliver 30 tons of force to its splitting wedge. This heavy duty attachment will handle logs up to 24" (610 mm) long and the 4-way splitter quarters the log in the same time it takes to split it once. There is a universal skid steer quick-attach bracket for direct mounting onto most skid steers. Other features include a detented control valve for automatic return and a heavy duty 5" x 24" (127 x 610 mm) cylinder. Comes complete with hoses and flat face couplers.

- ⊙ SPLITS LOGS UP TO 24" LONG WITH 30 TON FORCE
- ⊙ FOUR-WAY SPLITTER QUARTERS LOG
- ⊙ DETENTED CONTROL VALVE FOR AUTOMATIC RETURN
