

Log Splitter, Inverted

Never lift a heavy log again!

Split wood on the ground and save time and labor.

Powerful cylinder drives 20 tons of force to splitting wedge.

The EDGE Inverted Log Splitter provides a fast, easy and cost-effective alternative to the back-breaking job of splitting wood. Split twice the amount of wood in less time and effort. This efficient attachment will double your productivity!

The EDGE Inverted Log Splitter is designed to split logs right on the ground, or to lift and transport logs for splitting directly into a trailer or other location.

Operators can remain in the comfort and protection of the cab and manage all of the controls right from the seat. The front of the splitter can be used to position the log. Lower the splitter over the log and engage the auxiliary hydraulics to split logs up to 24" long.

The splitter on this attachment can also be unbolted from the quick attach and flipped 180 degrees for upright splitting applications. Comes complete with hoses and flat face couplers.

- ⊙ **NO NEED TO LIFT HEAVY WOOD FOR SPLITTING**
- ⊙ **OPERATE CONTROLS FROM THE COMFORT OF THE CAB**
- ⊙ **SPLITTER CAN BE CONVERTED FOR UPRIGHT SPLITTING APPLICATIONS**
- ⊙ **SPLIT LOGS UP TO 24" LONG**
