

Material Unroller

Quickly lay erosion control mats.

The EDGE material unroller's stem is used to pick up erosion control material rolls off of a truck, and can hydraulically pivot 180 degrees to unroll erosion control material on either side of the skid steer loader. It has a free wheeling stem hub, and the arm floats above or below horizontal position; it can be locked into upright position for transport as well. Contractors can cut their labor in half! Comes complete with hoses and flat face couplers.

Easily pick up material rolls from trucks.

- ⊙ **UP TO THREE TIMES THE PRODUCTION WITH HALF THE LABOR**
- ⊙ **PICKS UP MATERIAL OFF TRUCK, MOVES TO INSTALLATION SPOT, SWINGS 180 DEGREES TO UNROLL MATERIAL ON EITHER SIDE OF MACHINE**
- ⊙ **LOCKS IN VERTICAL POSITION FOR TRANSPORT**
