

Mowers, Rotary

EDGE Rotary Mowers are designed to cut through the thickest brush and glide over rough terrain with ease.

Built for performance to handle heavy weeds, undergrowth, brush and small saplings up to 3" (76 mm) in diameter. It will mow brush down, but won't bog down your motor.

Ideal applications include clearing trails for horses, snowmobiles, skiing or biking in areas that would normally be inaccessible.

Rotary brush mowers are available in widths from 48" (1219 mm) to 90" (2286 mm) for standard or high-flow hydraulic systems. Brush mowers feature a direct drive hydraulic motor requiring 8-40 gpm and a heavy duty stump jumper. Comes complete with hoses and flat face couplers.

- ⊙ **CUT AND MULCH TREES UP TO 3" IN DIAMETER**
- ⊙ **STEEL FRAME FOR GEARBOX FOR POSITIVE ALIGNMENT**
- ⊙ **BALANCED STUMP JUMPER FOR SMOOTH OPERATION**
