

Pallet Fork Frame with Grapple

Four easy to change cylinder settings maximize grapple opening and closing ability.

Hooked grapple arms clamp material secure for pickup and transport.

Single cylinder grapple featuring a unique jaw action which pulls material toward frame as jaw closes. Class II frame with 4 options to pin the cylinder to the grapple, maximizing grapple opening or closing force. Position can be changed in minutes for clamping small pipe to large culverts. Can also be used for moving loads of plywood or other building materials. Individual tines sold separately. Comes complete with hoses and flat face couplers.

- ⊙ **GRAB AND CARRY LOAD CAPACITIES UP TO 5000 LBS.**
- ⊙ **UNIQUE JAW ACTION PULLS MATERIAL TOWARD FRAME AS JAW CLOSES**
- ⊙ **4 EASY TO CHANGE GRAPPLE POSITIONS FOR CLAMPING SMALL OR LARGE OBJECTS**
