

Pallet Forks, Hydraulic

EDGE Rotating Hydraulic Pallet Forks (3700 lb. capacity at 24" load center) are hydraulically controlled right from the cab and rotate up to 180°. The 48" tines are manually adjustable. Ideal for loading palletized materials on uneven surfaces.

EDGE Side Shift Hydraulic Pallet Forks (3700 lb. capacity at 24" load center) are hydraulically adjusted from the cab to shift side to side up to 16" travel (8" right and left). Available in 42" or 48" tine lengths and are manually adjustable.

EDGE Sliding Tine Hydraulic Pallet Forks (3700 lb. capacity at 24" load center) hydraulically control the position of the pallet fork tines right from the cab. Available in 42" and 48" tine lengths that are adjusted together to keep the load centered. These pallet forks are ideal for clamping and are also referred to as nursery pallet forks.

SPECIFICATIONS

Part Number	Description	Weight (lbs/kg)	Capacity (lbs/kg) at 24" Load Center	Tine Length (in/mm)
501942	Rotating Pallet Fork 180 degrees	700/318	3700/1678	48/1219
501868	Side Shift Pallet Fork (16" travel - 8" right or left)	770/349		42/1067
501781	Side Shift Pallet Fork (16" travel - 8" right or left)	790/358		48/1219
501470	Sliding Tine Pallet Fork (slide right and left)	540/225		42/1067
501731	Sliding Tine Pallet Fork (slide right and left)	560/254		48/1219
