

So simple, yet so vital, the blade has stood the test of time. You'll find different blades for a variety of settings, conditions, and uses, including scraping and leveling, snow removal, and flood cleanup.

Heavy-Duty Snow Blade

Utility Snow Blade

You can clear snow with ease, or use this handy attachment for light dozing work. Snow blades range in size from 60" (1524 mm) to clear sidewalks to 120" (3048 mm) for clearing jobs as big as a parking lot. Steel cutting edges are standard equipment, and these blades feature right and left angling up to 30 degrees. Snow Blades have trip springs and skid shoes standard - all blades have replaceable cutting edges and hydraulic angles. Hoses and flat-faced couplers included.

- ⊙ **HEAVY DUTY BLADES FEATURE CUSHIONED CYLINDERS**
- ⊙ **30 DEGREE RIGHT AND LEFT ANGLING**
- ⊙ **TRIP SPRINGS AND SKID SHOES STANDARD**
