

# Trip Edge Snow Blades

So simple, yet so vital, the blade has stood the test of time. You'll find different blades for a variety of settings, conditions, and uses, including scraping and leveling, snow removal, and flood cleanup.

Trip Edge Snow Blades feature four compression springs that allow up to an 8 degree oscillation of the 5/8" x 8" reversible edge to follow uneven surfaces. It's heavy duty design allows full down pressure to keep in contact with the area being cleared. Other features include right and left hydraulic angle up to 30 degrees and adjustable skid shoes. Recommended for loaders with operating capacity greater than 1,500 lbs.

- ◎ **FOUR COMPRESSION SPRINGS THAT ALLOW UP TO 8 DEGREES OSCILLATION TO FOLLOW UNEVEN SURFACES**
