

Snow Push - Oscillating

The Oscillating Snow Push attachments feature a heavy duty frame that oscillates up to 8 degrees along uneven surfaces to keep the edge in contact with the surface being cleared.

Floating side plates and frame link allow the pusher weight to be transferred onto the edge. These Snow Pushes can also be used year round to move other materials such as flood-cleanup wastewater or manure. Comes with a reversible, replaceable rubber cutting edge with 3" of wear per side. Widths from 84" (2133 mm) to 108" (2743 mm) allow you to select the right size for your skid steer and your job.

Large plated pin & bolts allow for oscillation of the unit.

Optional Pull Back Kit

Optional Pull-Back Kits allow for down pressure on the rubber edge to draw snow or other materials away from confined spaces such as loading docks or buildings. This Pull-Back Kit includes the rubber cutting edge.

- ⊗ **HEAVY-DUTY FRAME OSCILLATES UP TO 8 DEGREES ALONG UNEVEN SURFACES**
- ⊗ **FLOATING SIDE PLATES AND FRAME LINK TRANSFERS PUSHER WEIGHT ONTO THE EDGE**
- ⊗ **COMES WITH REVERSIBLE, REPLACEABLE RUBBER CUTTING EDGE WITH 3" WEAR**
- ⊗ **SIZES FROM 84" (7-FT) TO 108" (9-FT)**
- ⊗ **OPTIONAL PULL-BACK KIT DRAWS SNOW BACK FROM CONFINED SPACES**
