

# Sand Spreader, Hydraulic

The hydraulic EDGE Sand Spreader is ideal for quickly spreading sand or salt/sand mixtures on icy or snow-covered sidewalks, driveways, parking lots and roads.

Simply scoop the material into the 8 cu. ft. hopper and begin spreading a path from 29 in. for sidewalks up to 28 ft. for larger areas.

An agitator inside the hopper prevents bridging of material to ensure constant flow and a heavy-duty screen with 3" openings is bolted to the top to protect inside components. Material moves down through 3 adjustable gates at the bottom of the hopper and onto an 18" wheel with 6 paddles that disperse the material.

An optional Sidewalk Deflector Kit allows you to spread the sand in one of two precisely measured widths keeping the material on the sidewalk or path. Set it up on inside pegs for a 29" radial spread or on the outside pegs for a 37" spread.

Steps are positioned on both sides of the unit for easy access to and from the cab. Unit comes complete with hoses and flat face couplers.

Self-loading hopper with cutting edge.

Agitator prevents bridging of material.

Easy access to hydraulic motor.

Adjustable gates control flow.

Peg settings for Sidewalk Deflector Kit

- ⊙ **SPREAD SAND QUICKLY AND EFFICIENTLY UP TO 28 FT.**
- ⊙ **SELF-LOADING 8 CU. FT. CAPACITY HOPPER WITH CUTTING EDGE AND LIFT HOOK HOLES**
- ⊙ **AGITATOR INSIDE HOPPER PREVENTS BRIDGING OF MATERIAL AND SMOOTH FLOW**
- ⊙ **3 ADJUSTABLE GATES CONTROL FLOW ONTO SPREADER WHEEL**
- ⊙ **SIDE STEPS FOR EASY ACCESS TO AND FROM THE CAB**
- ⊙ **OPTIONAL SIDEWALK DEFLECTOR KIT LIMITS SPREAD WIDTH TO 29" OR 37" WIDE**
