

Stump Removal Bucket

The EDGE Stump Removal Bucket is the ideal attachment for every landscape professional or every day skid steer operator in need of a multi-functional tool for quick and easy removal of tree stumps and roots, digging ditches or moving and placing rocks.

Features three durable 23-Series cast steel teeth that dig deep under roots of tree stumps. With the tilt of the quick attach, side teeth on the bucket cut through stubborn roots and help extract the stump and roots from the ground.

This versatile attachment can also use its strong 1/2" laser-cut funnel-shaped steel bucket to scoop and carry heavy rocks for placement on retaining walls or for moving trees. The robust 1" thick cutting edge channels deep into the ground for digging trenches or ditches as well.

- ⊙ **COST-EFFECTIVE ATTACHMENT FOR REMOVAL OF TREE STUMPS AND ROOTS**
