

Solid Flex Tires

Elliptical holes provide pneumatic-type ride.

Ideally used in severe applications like cold planing.

CEAttachments offers ruggedly constructed tires that give your compact equipment the advantage needed in the most severe conditions. Special application tires and options are available too!

These flat proof tires offer the ride of a pneumatic and the peace of mind of knowing there will be NO flats. They are made with a special mining rubber compound that resists tearing and chunking. Guaranteed to last 3x longer than pneumatic foam filled tires. Available in smooth and traction treads.

Model SFT10 & SFT12

Models STS7,
STS9 & STS10

Models SFT10
& SFT12

Model SFT14

- ⊗ TIRE MOLDED WITH RIM, NOT PRESSED ON; IDEAL FOR HIGH HORSEPOWER MACHINES
