

Tracks, Grouser - Crossbar

Better traction can mean better performance of your skid steer loader. Surfaces made slippery due to sand, snow, mud and rain may mean challenges, but not excuses. Tracks from CEA provide protection and reduce tire wear in abrasive conditions.

Grouser Crossbar Tracks increase traction and flotation in soft, muddy conditions and reduce ground pressure by as much as 50%. Features include 1-1/4" hardened field-replaceable bushings and a link design with 50% deeper end wear areas for longer endurance and operation. Crossbars and traction bars are induction hardened for greater durability and performance. Tracks are available to fit tires from 8.5" (216 mm) to 14" (356 mm).
