

Smooth Drum Vibratory Roller

It's easy to turn your skid steer loader into a high performance compactor with the EDGE Vibratory Roller. Available in smooth or padded drum versions for compacting various materials. Features include a heavy duty motor mounted outside the drum for less wear and easier maintenance. The knockdown blade has a replaceable cutting edge. Oversized bearings and high temperature seals minimize bearing failure, and a flow control valve is standard equipment to prevent over-speeding of the eccentric shaft and extend bearing life.

The smooth drum roller is a tough compaction tool for compacting dirt, sand, gravel, asphalt or backfill. Widths of 73" (1854 mm) and 84" (2133 mm) and centrifugal force up to 9765 lbf (43.4 kN) means you can handle big jobs fast!

SPECIFICATIONS

Model	Weight (lbs/kg)	Hyd. Req. (gpm/lpm)	Working Width (in/mm)	Centrifugal Force (lbf/kN)
VR84S	2300/1043.3	10-20/38-76	84/2133	9765/43.4
VR73S	2050/929.9		73/1854	8850/39.4
